*The power rating of the engine indicated in this document is the net power output tested on a production engine for the engine model and measured in accordance with SAE J1349 at a specified rpm. Mass production engines may vary from this value. Actual power output for the engine installed in the final machine will vary depending on numerous factors, including the operating speed of the engine in application, environmental conditions, maintenance, and other variables.

- **Cast iron pump with oil splash lubrication and ball bearing mounted crank shaft** for durability
- **10" fly cooling wheel, coupled with a shroud to direct air over compressor coils**, allows continuous use without the threat overheating
- **Belt drive** lowers pump RPM for longer life
